

What is Bioresonance?

For thousands of years all schools of medicine including; Ayurvedic, Chinese, Egyptian, etc., have considered energy as the most important element of a human being's health. In ancient Egypt the energetic waves of life were magically expressed on the face of the temples "Nothing is inert, everything is vibration, and everything vibrates (or oscillates)". Albert Einstein's Theory of Relativity documented the fact that man apart from matter (biochemical identity) is composed of an electromagnetic field (biophysics identity – electromagnetic oscillations).

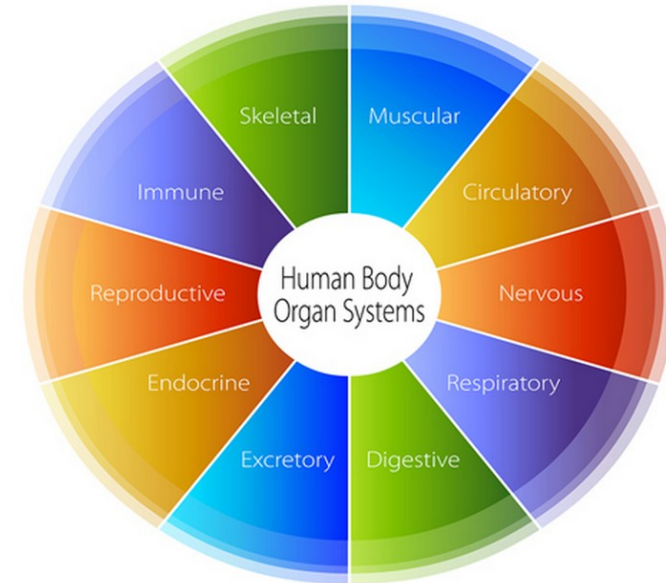

Every change in health in our physical body, in organs and tissues implies a difference in our electromagnetic oscillations. Since different states of health are represented by different electromagnetic wave lengths or frequencies emitted by the body,

bioresonance testing uses electromagnetic frequencies generated by the body to detect the presence of parasites, bacteria, toxins, and other health disrupters. Every cell produces tiny electromagnetic vibrations. Cells that are in good health emit harmonious signals that freely resonate with each other. Toxins or microbes that infect a cell add their own frequencies and distort the cell's natural signal. When a cell is damaged or diseased, it loses electrons creating an unbalanced spin. This unbalanced spin creates abnormal electromagnetic waves. The Quantitative Cellular Analyzer detects these changes in electromagnetic waves emitted by the body's cells. By holding a sensor in the palm of the hand the QCA analyzes weak cellular electromagnetic waves throughout the body. Bioresonance is the medicine of the future. The QCA is the tool of the of the future, being non-invasive, fast and has the ability to detect changes on a cellular level very early on, before major pathological changes have had a chance to develop – making it an excellent preventative tool.

We offer employers the opportunity to have healthier and more productive employees as well as reduce the enormous cost of healthcare.

We provide a whole body solution; forewarning of potential health issues before they become health problems. Within minutes, using the latest non-invasive technology, we perform an entire body screening of 235+ facets of a person's health including pre-symptom cellular tendencies.

Members receive their confidential comprehensive personal health report within 24-48 hours of screening. Incorporated within the report is a link to our proprietary database that contains explanations of the 235+ measurements, expert research, evidence-based studies and world-wide natural preventative measures utilized by others.
